The application refers to selecting a "job posting" website that best fits your needs. Specifically looking for art that ranks websites based on information, i.e., selection criteria (preferably in a database) using an inference engine, i.e., expert system. I have a reference that talks about picking a job posting site to use, but it does not tell me how it calculates or selects the site. (Business Wire links corporate recruiting desktops to over 2000 job posting sites, Business Wire, March 2, 2000 [PROQUEST])
